NC4 Embeds frevvo Live Forms™ to Expand Emergency Management and Secure Collaboration Capabilities

Partnership with frevvo creates unlimited flexibility in form creation and management

EL SEGUNDO, CA – October 8, 2009 – NC4, Inc., the leader in Situational Readiness solutions for incident monitoring, crisis management, and secure collaboration, today announced a partnership with frevvo, who specializes in empowering businesses to create rich, dynamic Internet applications. This joint partnership will expand the capabilities of NC4’s emergency management software and collaboration platform to include the ability to generate customized dynamic web-based forms to better support customers’ diverse needs.

NC4 has been working with frevvo for close to a year to integrate their Live Forms™ technology into NC4’s application suite. “Enhancing NC4’s capabilities to include customized forms that can be easily created inside of our applications provides a new level of flexibility that allows us to more acutely respond to our customers’ individual needs,” says Jim Montagnino, President and CEO of NC4.

Live Forms™ provides an intuitive “drag-and-drop” interface that gives non-technical users the ability to create simple forms in a matter of minutes. For more complex forms, the form builder can also contain business rules, complex validation, XML document processing, automatic form generation from XML schema and other useful functions. “Live Forms is designed to work in conjunction with other web-based applications to enhance the user experience and to easily capture user data,” said Ashish Deshpande, CEO, frevvo. “We are excited to be partnering with NC4 to give customers the ability to utilize Live Forms™ to support emergency management and mission critical activities.”

Live Forms™ is being integrated into NC4's software to enrich the versatility of the in-depth functionality inherent in the software. It also allows for the creation of specialized reports based on form content. This form capability is being tested by several NC4 customers and has already been used for exercise planning and emergency response operations. NC4 will be announcing broader availability within their Readiness Suite early next year.

About frevvo

frevvo is empowering businesses to create rich, dynamic Internet applications. By using just a Web browser, frevvo's highly collaborative Live Forms software enables users – from relatively less technical power users to highly technical developers – at companies to easily create rich AJAX forms with built-in business capabilities. Businesses can quickly add user-friendly forms to their Web pages and connect them to users, data and applications. Unlike other offerings, frevvo eliminates cumbersome programming, deployment and cost typically associated with Internet forms. As a result, companies can simultaneously enhance end user experience as well as business efficiencies while gaining a competitive edge.

Live Forms is available in several flexible editions using both the SaaS model as well as a downloadable in-house version and is 100 percent embeddable in partner products. For more information, please call 1-203-208-3117 or visit www.frevvo.com.

About NC4

NC4 delivers Situational Readiness solutions that empower government and businesses with accurate, timely and secure information to manage uncertainty. The NC4 product suite is used by emergency management, Federal agencies, financial services, law enforcement, as well as consulting, high-tech, insurance, aerospace and defense, oil and gas, and pharmaceutical and healthcare. NC4 takes a comprehensive and integrated approach to both crisis management and security, by providing: Situational Awareness both for External (ESA) and Internal (ISA) incident/event monitoring; Situational Response with our E Team application; and Secure Communication and Collaboration through our Extranet Secure Portals (ESP). For information about NC4, visit www.nc4.us or call toll-free, 1-877-624-4999.
